key - electronic system
 Traveler w
 Govt works areas

Govt would have key to emergency baggage

Most people don't lock their luggage
 but some times I left for airport

My company used only TSA to lock the key to the
 TSA (lock key) & Security Group

Another worker can get into the luggage lock

In our system if terrorist slipped a bad
 bomb to an already inspected baggage
 it would cause suspicion because
 the terrorist would have to slip the
 lock or otherwise break into the baggage
 With a system now in use, checked baggage
 is vulnerable to key tampering w/ after
 inspection
